

**Assignment**

Sum all the odd numbers from 0 to 100 and print it to the screen.

Code:

```
sum_total= sum(i for i in range(1, 101) if i % 2 != 0)
```

```
print(sum_total)
```

The screenshot shows a code editor window with a dark theme. The editor has a tab labeled 'main.py' and a toolbar with icons for undo, redo, and a 'Share' button. The code is as follows:

```
1
2
3 sum_total = sum(i for i in range(1, 101) if i % 2 != 0)
4 print(sum_total)
5
```

To the right of the code editor is an 'Output' panel. It displays the number '2500' and the message '=== Code Execution Successful ==='.
